Iori Kawano

UI/UX Designer

Tokyo, Japan · iorikawano.design@gmail.com
iori-kawano.vercel.app · linkedin.com/in/iori-kawano

SUMMARY

UI/UX designer designing digital services across a range of industries, along with the tooling that supports how they are run. Works from information design through to how the finished product is actually experienced. Bilingual Japanese/English.

WORK EXPERIENCE

UI/UX Designer, Accenture Song

December 2025 - Present

Design system, proposal, and mockup work across aviation, education, retail, finance, and transportation.

- TRANSPORTATION — Supported an RFP proposal for a transport operator's app redesign: VoC and analytics review, as-is/to-be information architecture, and concept direction.
- FINANCE — Designed the procedure-selection home of a banking app so one layout holds in Japanese and a second language; created the account-inquiry icon set and merged components into the existing design system.
- RETAIL — Led UI mockups for an inbound-tourist area app (map, trip plan, membership wallet) and supported a proposal for a retailer's e-commerce renewal.
- UNIVERSITY — Owned the Figma prototype design for an alumni donation app in 2.5 weeks, with a team of 6 across 4 organizations.
- AIRLINE — Built the token foundation of a multi-platform design system, with light/dark modes and targeting WCAG AA, along with the tooling that supports its day-to-day use.

UI/UX Designer, YUMEMI Inc.

April 2025 - November 2025

Joined full-time after graduating.

- CONSUMER ELECTRONICS — Designed the UI for a smart-home voice push-notification service across two tracks (in-house hub + third-party speaker setup).
- CONSTRUCTION TECH — Contributed to the UI renewal of a video learning platform for skilled-trade workers in the housing construction industry, on a three-person design team.

UI/UX Designer (Internship), YUMEMI Inc.

June 2024 - March 2025

Joined as a design intern while still at university. Shipped client work across consumer electronics, beauty, and public-sector digital, plus a self-initiated internal data visualization project.

- INTERNAL — Self-initiated: redesigned the quarterly internal employee survey report and built the visualization pipeline behind it.
- PUBLIC SECTOR DIGITAL — Joined a design system build to produce its documentation site: Figma main components for the page designs, and roughly 50 pages assembled in STUDIO.
- CONSUMER ELECTRONICS — Refactored the design environment for a smart home voice notification service.
- BEAUTY — Designed feature-introduction landing pages for six brands in a major cosmetics group, built as one template with per-brand variants.

Assistant, Development Department (Internship), Kibidango, Inc.

July 2023 - March 2024

Worked as an assistant in the development department. Learned the basics of the product development process and team collaboration, which became the foundation for the UI/UX design career that followed.

SELECTED WORK

Ukiyoe: Layer by Layer iori-kawano.vercel.app/work/ukiyoe — 2025 - 2026
Google UX Design Certificate Project iori-kawano.vercel.app/work/google_ux_design_certificate_project — 2024
